

# CoaLAB 1000

---

**The CoaLAB 1000 is a compact fully automated clotting, chromogenic and immunturbidimetric coagulation analyzer. It is designed for low and medium volume laboratories or as a reliable backup system in larger labs.**

**The analyzer uses two high-resolution photometric measuring channels, of which each is equipped with up to three wavelengths. Thus, the analyzer ensures a precise and reliable result determination over the entire coagulation spectrum.**
